Roma, 28 maggio 2014

mFp international: the collaboration with NIDA and the Global Community on Neuroscience of Addiction

Claudia Rimondo MAS, Giovanni Serpelloni MD, Maurizio Gomma MD

I agreement
Washington, 11th July 2011

PRESIDENZA DEL CONSIGLIO DEI MINISTRI
Dipartimento Politiche Antidroga

NIDA
NATIONAL INSTITUTE
ON DRUG ABUSE

II agreement
Rome, 25th July 2011

- Technical-scientific agreement
- It gives concreteness to the political agreement
- It encourages the conduct of mutually beneficial scientific researches on drug issues

ADDICTION NCCN

**National
Coordination
Center for
NIDA Collaboration**

Regione del Veneto
Azienda ULSS 20 Verona
Dipartimento delle Dipendenze

Project Global Community on Neuroscience of Addiction

Recipient entity

Regione del Veneto - Azienda ULSS 20
Dipartimento delle Dipendenze

In collaboration with

Other participants

UNODC

United Nations Office on Drugs and Crime

unicri

United Nations
Interregional Crime and Justice
Research Institute

Substance Abuse and Mental Health Services Administration

SAMHSA

www.samhsa.gov • 1-877-SAMHSA-7 (1-877-726-4727)

**BILL & MELINDA
GATES foundation**

Razionale

1. Many interpretations of the phenomenon of addiction and its pathological manifestations are often based on **concepts and approaches which do not take into account scientific evidences, especially from neuroscience.**

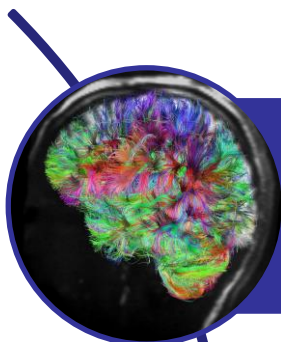

2. Researchers and their scientific findings and working methods are **poorly connected and shared**, slowing down scientific discoveries and reducing global knowledge on the topic.

3. **Poor connection between researchers** conducting ground-breaking and advanced research in the field of the neuroscience of addiction **and healthcare professionals and education and rehabilitation professionals.**

Main objectives

1. Promoting scientific research and the sharing of information, scientific protocols, methods, good practices in the field of neuroscience of addiction

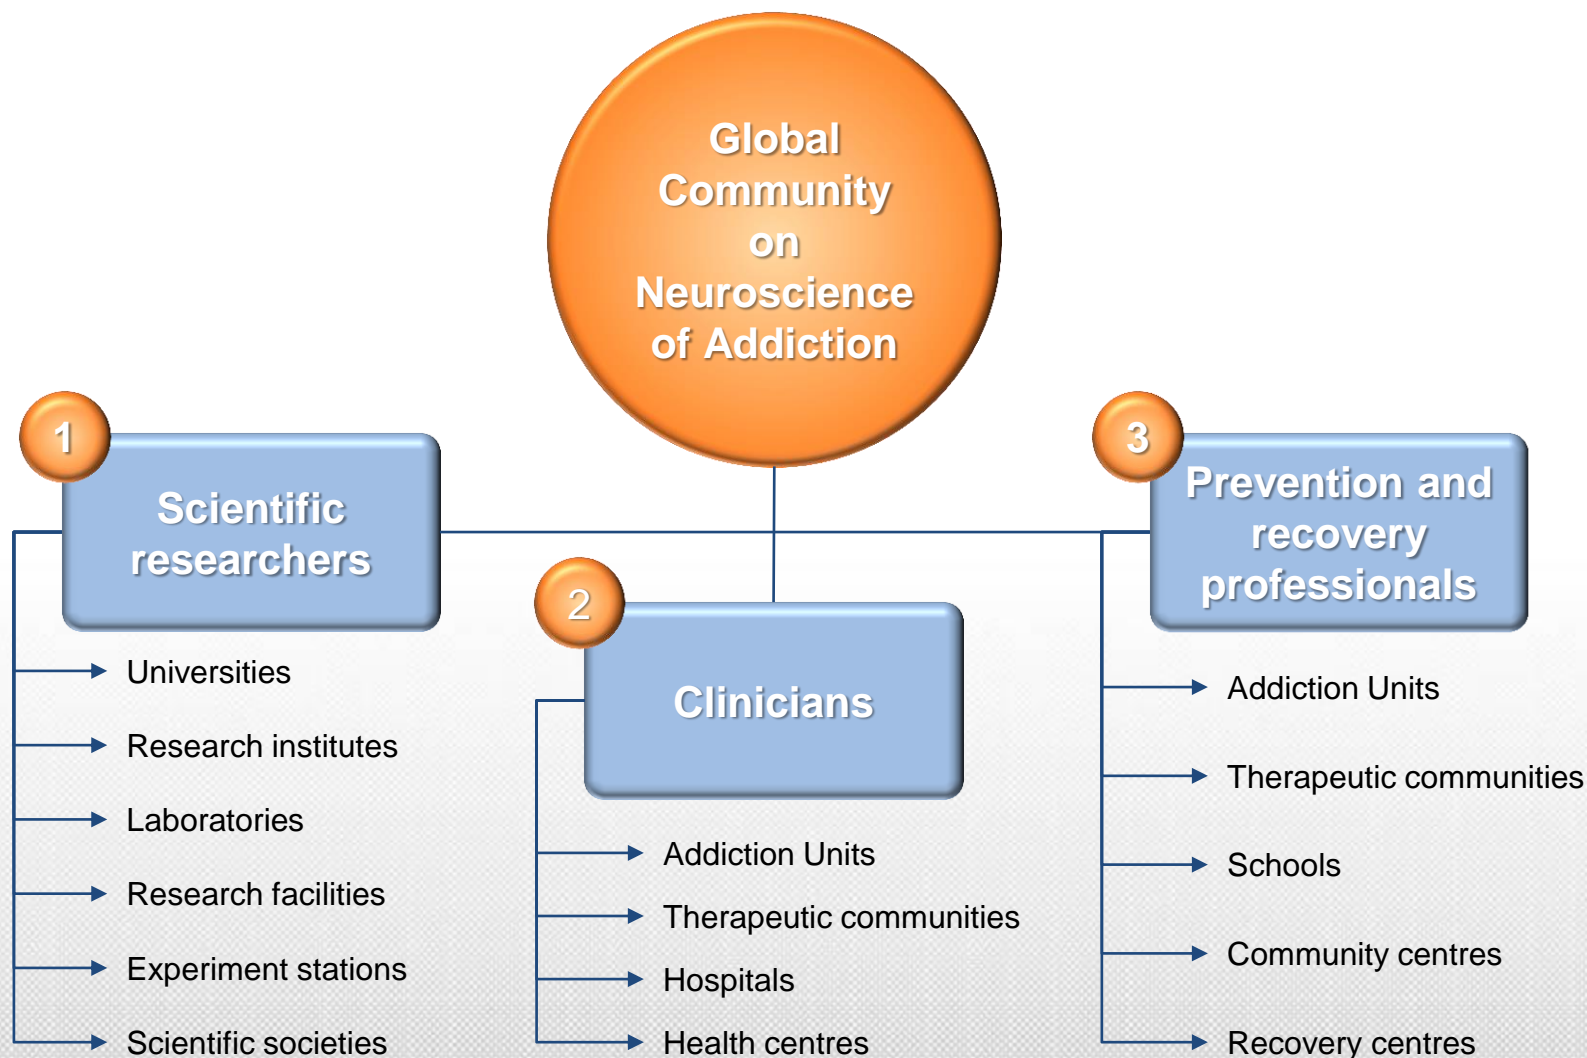

2. Creating a global community promoting a new approach to the phenomenon of drug use and addiction which has neuroscience as its starting point

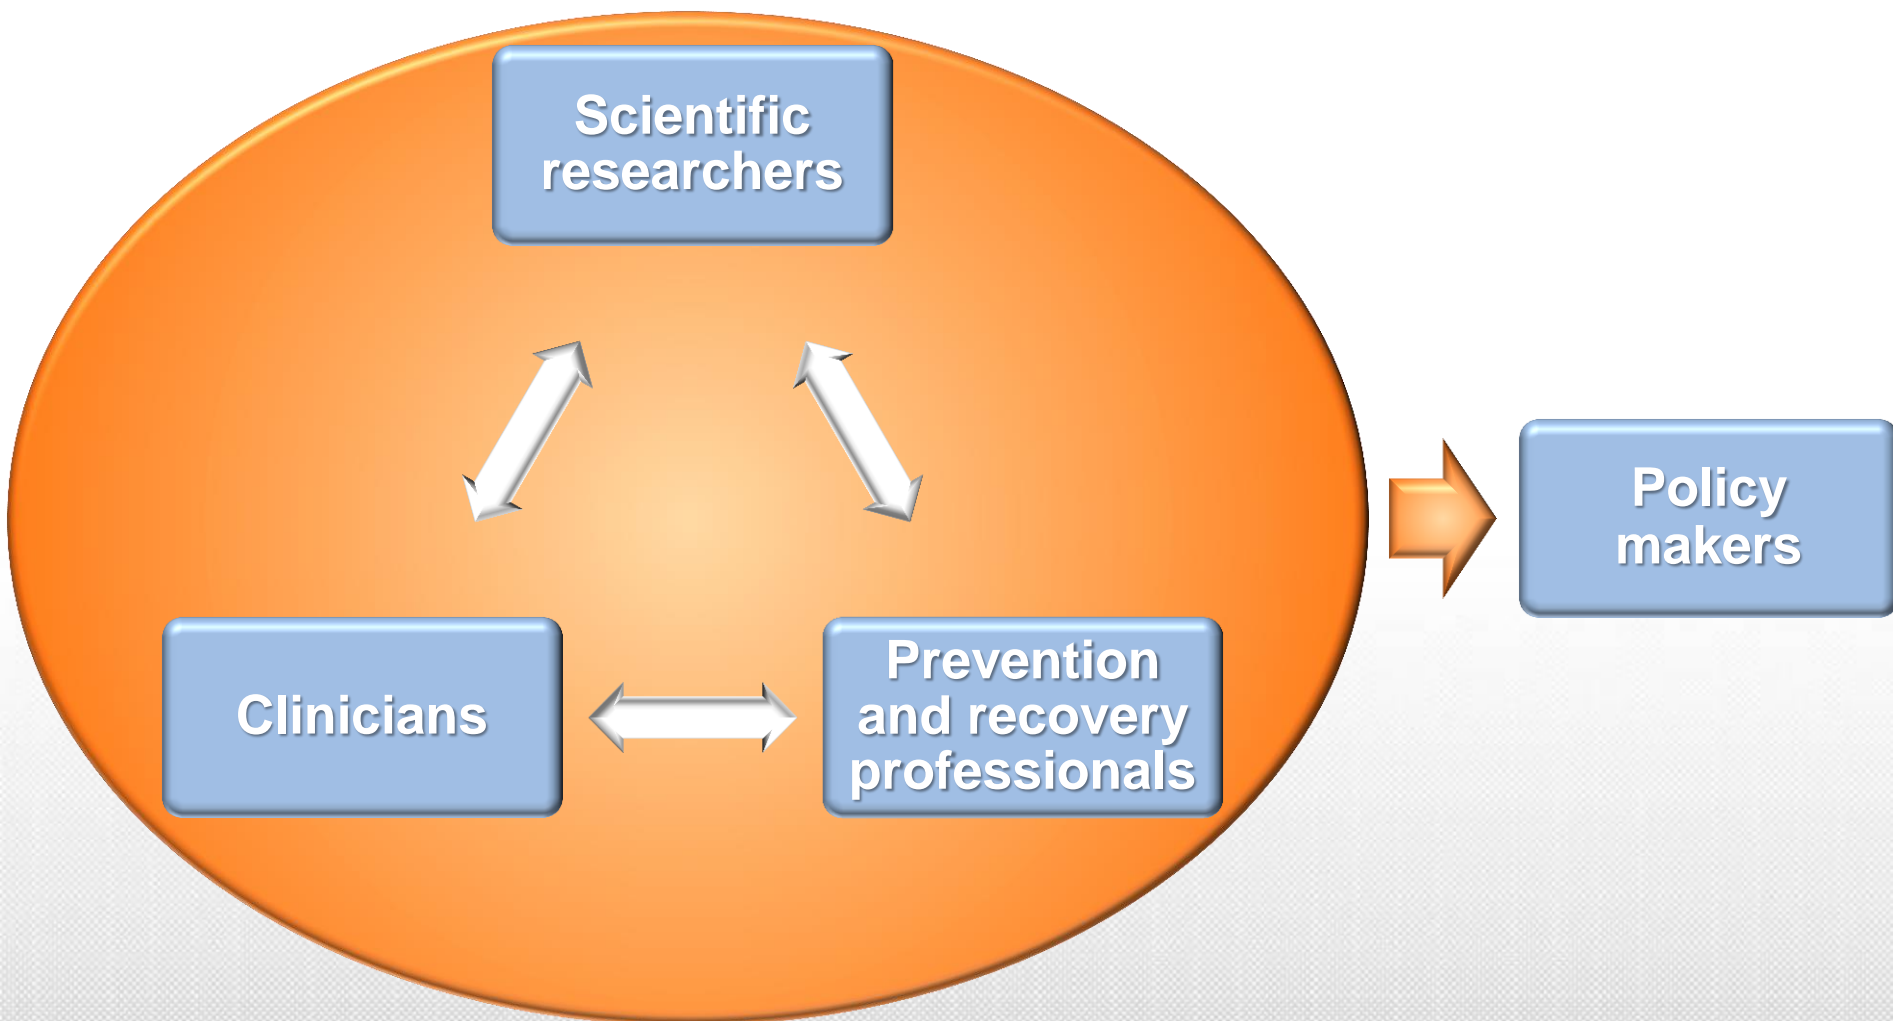

3. Improving national and international systems engaged in research and management of addiction via the promotion of mutual support generated by the collaboration of professionals working in the addiction field

Primary target

Secondary target

The GCNA project and MFP international

Objective n. 8

**To design and develop
a new software for
clinical research data
management for
addicted people,
based on the MFP
platform, to be
proposed as a
standard system for
clinical centres**

Type of patients

Patients with
drug addiction

Patients with
alcohol
addiction

Patients with
other
behavioural
addictions
(ie. pathological
gamblers)

International partners

USA

EU

Fed. Russa

Cina

Algeria

Tunisia

Libia

Egitto

Israele

Arabia Saudita

Vietnam

National partners

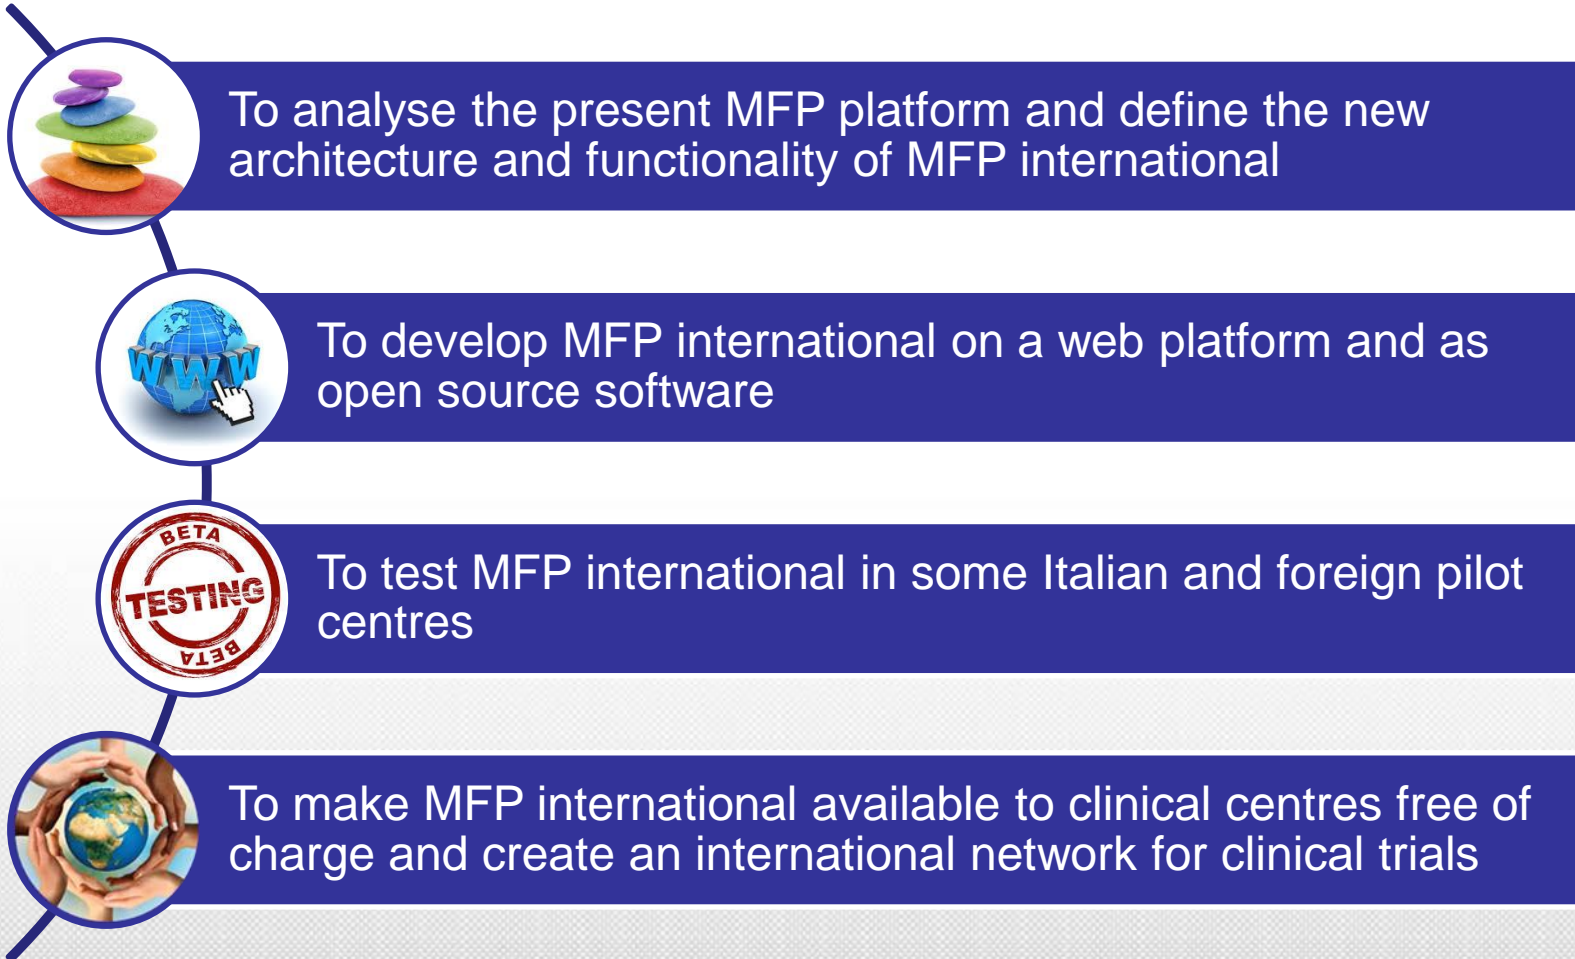

- The Outcome network
- Other interested
Addiction Departments

mFp
community

Methods

Opportunities for Italian Addiction Units (I)

1. To participate to MFP Community network

2. To participate to the working group for the definition, test and widespread of MFP international

3. To participate to the technical-scientific comparison with international partners

4. To participate to the Global Community on Neuroscience of Addiction

5. To promote Italian best practices in the addiction field in the world

Opportunities for Italian Addiction Units (II)

6. To train international partners (in Italy and abroad)

7. To participate to international scientific researches

8. To promote results of researches at international level

9. To issue scientific papers on international journals

10. To provide technical-scientific guidance for strategies and policies of policymakers
